America at the Crossroads- Liberty or Tyranny? (/archives/featured-articles/2021/september/24/america-at-the-crossroads-liberty-or-tyranny/)

written by [jeff harris \(/archives/featured-articles/?author=jeff+harris\)](/archives/featured-articles/?author=jeff+harris)

friday september 24, 2021

The daily lecturing and scolding by media, medical “experts”, politicians and worry warts to take the Covid-19 “Vaccine” is unprecedented. To hear them tell it EVERYONE should be fully vaccinated including children. Time and time again you hear, “Just shut up and get the shot!” as if repeating the same mantra over and over makes it true.

But if you talk to seasoned medical professionals privately (the medical community is terrified of being cancelled if they dare speak truth publicly) they will tell you there has never been a medication suitable for every single human being on earth. Human beings are marvelously unique creatures that require specialized care based on their particular health circumstances.

What about aspirin? The Bayer pharmaceutical company began producing aspirin in 1897, 124 years ago so we’ve had plenty of time to learn about the benefits and risk factors it entails. If you go to Harvard Health Publishing/ Harvard Medical School [Answers about aspirin - Harvard Health \(https://www.health.harvard.edu/heart-health/answers-about-aspirin\)](https://www.health.harvard.edu/heart-health/answers-about-aspirin) you’ll learn that it’s NOT a good idea for EVERYONE to take aspirin:

'A lot of people take aspirin who really shouldn't,' says Dr. Christopher Cannon, a cardiologist at Brigham and Women's Hospital and professor of medicine at Harvard Medical School.

'Everyone assumes aspirin is harmless, but it's not.' For some, the downsides of aspirin—mainly gastrointestinal bleeding—outweigh its benefits.”

Imagine that!

The lowly, benign aspirin’s potential risks may outweigh any benefits.

But there is a global push to force EVERYONE to be injected with a hastily cobbled together gene altering treatment with NO long-term risk studies that is called a “Vaccine”. All this to counter a virus that according to the CDC is survivable by 99.74% of the people infected by it?

Well as we know now it’s a “vaccine” in name only because it doesn’t appear to work very well. [Health Ministry chief says coronavirus spread reaching record heights | The Times of Israel \(https://www.timesofisrael.com/health-ministry-chief-says-coronavirus-spread-reaching-record-heights/\)](https://www.timesofisrael.com/health-ministry-chief-says-coronavirus-spread-reaching-record-heights/) On Tuesday September 14, 2021, the Times of Israel reported that:

The current wave of coronavirus infections is surpassing anything seen in previous outbreaks." Health Ministry data "showed that 10,000 new covid cases were diagnosed in a single day.

According to the Israeli Health Ministry 84% of the people age 12 and up are fully vaccinated against Covid-19 making it one of the most highly "vaccinated" countries in the world. It's obvious the vaccine doesn't work as advertised. But it's worse than that. Not only does it not work very well it has some very nasty side effects for some people.

According to the CDC over 14,000 Americans have died due to an adverse reaction to the "vaccine." Childrens' Health Defense (<https://childrenshealthdefense.org/>) reported:

Data released today by the Centers for Disease Control and Prevention (CDC) showed that between Dec. 14, 2020 and Sept. 3, 2021, a total of 675,593 adverse events (<https://www.medalerts.org/vaersdb/findfield.php?TABLE=ON&GROUP1=CAT&EVENTS=ON&VAX=COVID19>) following COVID vaccines were reported to the Vaccine Adverse Event Reporting System (VAERS). The data included a total of 14,506 reports of deaths (<https://www.medalerts.org/vaersdb/findfield.php?TABLE=ON&GROUP1=AGE&EVENTS=ON&VAX=COVID19&DIED=Yes>) — an increase of 595 over the previous week.

Last week President Joe Biden scolded American's who are reluctant to have the Covid-19 "vaccine" cocktail injected into their bodies. He insisted the "vaccine" was safe and effective, even though the data says otherwise.

President Biden's patience with those who choose to decide what to inject in their bodies is about up and he's ordered businesses with at least 100 employees to take the job, regardless of their personal medical history! And he wants any US military personnel who refuse the injection to be given a Dishonorable Discharge which would effectively cancel them from meaningful employment.

Any thinking person can see through what's going on here. This is not about protecting anyone's health, it's about power and control. And possibly the "vaccine" is intended to cull some of the useless eaters stinking up the planet and ruining it for the elites!

The hysterical "Get the job!" shrieking makes one think of the famous line in Shakespeare's Hamlet, 'The lady doth protest too much, methinks,' In this case the anguished cry's for everyone to take the job, with absolutely no regard for individual medical conditions should serve as a sober warning for the real game that's afoot.

Aleksandr Solzhenitsyn was a Russian novelist, philosopher, historian, short story writer, and political prisoner. He spent several years in Soviet prison camps for his anti-totalitarian views. He said:

What would things been like [in Russia] if during periods of mass arrests people had not simply sat there, paling with terror at every bang on the downstairs door and at every step on the staircase, but understood they had nothing to lose and had boldly set up in the downstairs hall an ambush of half a dozen people?

The fact is this madness will not blow over if we just try to get through it and passively go along with the flow. A bully is never stopped by compliance but by resistance. Peaceful resistance is preferable. By simply refusing to comply with the tyrannical edicts we drain them of power. But American's are well armed, unlike the U.K and Australia.

The tyrants know that pushing freedom loving American's too far could end their reign of terror. We have the numbers on our side provided enough are willing to say "No, I will not comply." We have the power to stop this. The only question is, will enough of us use it?
